Science (CS110)*

-Graduated First Class (3.54 CGPA)

Universiti Teknologi MARA (UiTM) Kampus Tapah, Perak (2024-present)

*-Currently in last semester in Bachelor of Computer
Science (HONS.) (CS230)*

-Current CGPA stands at 3.76

MY EXPERTISE

- Website Development and App Development
Java, MySQL, PHP, JavaScript, React.js, Artificial Intelligence, Node.js, Expo, Firebase, Python, C++
- Graphic Design
Adobe Photoshop, Canva, Adobe Illustrator, Adobe After Effects
- Photography & Videography
Adobe Lightroom, Adobe Premiere Pro

PROJECT EXPERIENCE

Data Visualization

- Created a detailed visualisation of Malaysia's socioeconomic classes.
- Designed a magazine for the data storytelling.
- Used PowerBI and Adobe Illustrator for the visualization.

Mobile App and Web Development

- Developed a production-ready cross-platform mobile (iOS & Android) and web application using React Native and modern web technologies to digitize attendance tracking for UiTM students through QR code authentication.
- Implemented RESTful API architecture with MySQL relational database to handle secure user authentication, role-based access control, attendance logs, and profile management. Designed scalable database schemas to ensure data integrity and efficient query performance.
- Applied real-world software engineering practices including modular component architecture, reusable UI components, API integration, and structured state management to improve maintainability and scalability.

KiraKira Friendly Car Sales Advisor Chatbot

The project introduces KiraKira Bot, a user-friendly chatbot designed to assist individuals in understanding and estimating their car loan commitments. Targeted primarily at young adults and first-time car buyers in Malaysia, the chatbot helps users calculate monthly payments by collecting key loan parameters like car price, down payment, interest rate, and loan duration. By presenting information in a casual, emoji-enhanced style, KiraKira Bot creates a relaxed environment for financial decision-making. This tool simplifies the loan calculation process, encourages financial literacy, and supports users who may find traditional financial tools intimidating or complicated.

RELEVANT COURSEWORKS

- Web Development and Mobile App Development
- Data Structure
- Software Engineering
- Database Management
- Compilers
- Data Visualization and Storytelling
- Multimedia

RELEVANT EXPERIENCE
